

Introduction

My name is Lili Anna Dorogi and I am 15 years old. I live in Kőszeg in a small flat with my parents and my sister. My sister is 11 years old and she studies at the Béni Balog Ádám Primary School. I studied at the Balog School to and now I am studying at the Jurisich Miklós Secondary school, in the 10.d class. I started to learn English last year and I have been learning German for 9 years. My favourite lessons are English and the art. I love drawing so I want to be an interior designer. I watch a lot of designer television programs, e.g.: the Extreme Makeover Home edition, The World's Greenest Houses.

I have a lot of hobbies e.g.: I love dancing. I dance in a Jazz Ballet group in the Balog School, in the Dance Jam group. I have 2 trainings a week, on Tuesday and on Thursday. We go to dancing competition many times in Hungary and to abroad. I studied at BGMS how to play the flute but I finished it and started to learn how to play the clarinet 8 years ago. Unfortunately I gave it up because I have to learn a lot. I don't have much free time but I like listening to music. My favourite singers are Pink and Beyonce. I like playing computer games and watching television. I love watching movies; my favourite films are the Harry Potter, The Lord of the Rings, Star Wars and Step up. I love reading to, I have read the Harry Potter and The Lord of the Rings these are my favourite books. In summer I had a lot of free time so I could read a lot. I read some from Agatha Christie e.g.: The ABC Murders, 4:50 from Paddington, Three Blind Mice. I have read the Pride and Prejudice and I have watched the film too. It was a brilliant book I loved it. In summer I read the St. Johanna High school and this is my other favourite book.

I like meeting with my friends. I have a lot of friends but my best friends are called Cinti, Gréta and Ivett. We met 7 years ago when we were 8 years old. It was my first day at the Balog School. We gave birthday parties and sometimes we went for picnics. We dance together in the jazz ballet group so we meet a lot. Ivett and Gréta are my classmates in the High School but Cinti is not. They are different but they are helpful, funny, reliable and very good friends.

I love the languages and I would like to study French. I am interesting in other culture of countries. I would like to travel around the world and meet with other people. This is the reason why I put in for this project.

Isolation

This word reminds me of a lot of things.

People isolate the other people from the society, all over the world because of the colour bar, religion, disease or deficiency, or if somebody is too skinny or too fat.

Because of external, people have prejudice and these have an influence on isolated people so they can hardly find a well paid job that they like too. In a lot of countries people can't travel with a same bus, go to the same school or restaurant like the white people because of colour bar. In the XV-XVI century the people chased the women, who can heal the sick people and they called them witches. Until the XX century the women didn't have suffrage and they couldn't go to university.

We can isolate us voluntarily from the civilization when we go to a wood for a camping and we haven't got any mobile phone, compute, television and any electric apparatus. People sleep in a tent and sit and eat by the fire. This lifestyle is very interesting and relaxing because we are far away from the busy cities and we can forget about our problems. People who live in a farm they are also isolated from the society, they are far away from a city or a bigger town. But people can isolate them involuntary from the civilisation. In the XIX century when people travelled by a ship and unfortunately they had an accident because of a great storm and their ship sank but they arrived at an uninhabited island. I have read a lot of books about this situation, e.g.: Jules Verne: Two Years' Vacation, Defoe: Robinson Crusoe and William Golding: Lord of the Flies. These books show us that how the people behave in these situations. Can people logically think or the animal instinct will control them?

We find isolation in the schools. Many times teenagers are felon with the others because of how they look like. It is not all the same that you are fat or gaunt, their clothes are trendy and branded or not, what kind of music do you listen to, who are your friends? What kind of mobile phone do you have, are you rich or poor? If somebody plays in a football team or they are a cheerleader they are cool but if somebody reads a lot of books or he/she is very shy then the others isolate him/her.

The isolation is appearing in the dance as well. When the dancers do warm-up exercises, they do isolated exercises too. With these exercises we isolate our brawns and they intensify the isolated brawn. I dance in a jazz ballet group and we do these isolated exercises. It is not so easy like it looks because we must concentrate on the exercises.

I think it is not so good that people isolate the others from the society because of colour bar or religion because if somebody is an African or redskin he/she can work so well like a European people and we should not let the people isolate him/her. The deficiency people are so useful member of the society like their healthy fellow-creatures. I think the isolation in the schools is inhuman. People should not isolate the others if they are fat or gaunt, not so rich or not so nice. Parents should teach tolerance to their children. Unfortunately sometimes the parents don't know what tolerance is.
